## WAY TO SPRAY STRAWBERRIES

Leaf Blight Causes Spots on Leaves and Weakens Plants—Remedy for Leaf Roller.

(By W. H. CHANDLER.)  
Leaf blight is a disease which causes spots on strawberry leaves. With some varieties it very seriously weakens the plants. Varieties like Aroma and Gaudy very largely resist it.

Spray with Bordeaux mixture after the crop is harvested, probably after renewing has been done, and give three or four sprayings at intervals of two weeks. On badly infested beds after the crop is off, mow everything down and let it dry and burn off when there is a brisk wind, then follow with a spraying.

The strawberry leaf roller is a moth that appears in the spring, depositing eggs on the leaves. When the eggs hatch, the larvae feed upon the leaves, folding the leaves over and fastening them by means of a silken thread. They thus eat only on the inner side of this folded leaf. They sometimes seriously injure the plants, causing them to dry up. There are two broods a year. The second brood appears shortly after the strawberries have been gathered.

The surest remedy for this insect is to mow down the plants and weeds and burn the bed off shortly after the strawberries have been picked. Spraying when the berries are about one-half grown with arsenical poison will kill the insect, but it is difficult to spray strawberries as they are so soon ripe after they set. The burning off process recommended does not seem to be entirely harmless to the strawberry field, as occasionally some plants will be killed and it will thus be more difficult to secure a good row for the next year.

The white grub that bothers us in the garden sometimes may be a fairly troublesome insect in the strawberry field. The insect feeds upon the roots of some plants, especially grasses.

Leaf Showing Injury.

When the field is plowed up, if they are numerous they may feed upon the strawberry root and do considerable harm.

The remedy is to grow some other crop than grass or strawberries on the land until they are starved out.

The Crown Borer is a beetle somewhat similar to the Plum Curculio. They deposit their eggs in June or early July. The eggs hatch into larvae that eat their way into the crown and there in feeding, mine out the crown more or less.

These beetles do not migrate very badly, so the best remedy is to rotate the crop, putting no strawberries on land that has been in strawberries during the previous few years, provided these insects are serious.

#### For Tree Planting.

If you intend to plant a few choice trees next spring dig large holes for them this fall, fill them with manure, removing it next spring and filling in up to the desired depth for the tree.

## HORTICULTURAL NOTES

Most small fruits form their fruit buds in the spring.

The quickest growing tree for a shelter belt is the willow.

Remember that the wood ashes are the best kind of fertilizer for the orchard, lawn or garden.

The city dealer profits by the laziness of the grower by grading and repacking his badly assorted fruit.

Young fruit trees that were planted in the autumn of last year, or in the spring of this year, should be examined carefully.

That corky old apple, the Ben Davis, still holds a high place in the city markets because its fine appearance deceives the ignorant buyer.

In very dry weather fruit buds are formed quite early and in case of a wet fall immature fruit buds sometimes change into leaf buds.

Unless rotten apples are promptly removed from the orchard, fruit pests will have an ideal place in which to hibernate during the winter months.

After the raspberries are through fruiting, the old canes are taken out. The canes made this year will produce the fruit next year. Burn the prunings.

Cantaloupes should not be grown near squash, pumpkin or cucumber vines, as the pollen will mix, giving the cantaloupes a flavor of the squash or cucumber.

Spray the apples twice with Bordeaux mixture to prevent injury from bitter rot. Put arsenate of lead in it to destroy late-hatched insects, such as the fall web worm.

Spraying with kerosene emulsion is one of the best remedies for the rose leaf hopper. Make the first application as the pest first appears and repeat as often as is necessary.

Strawberry plants that have been grown all summer in pots and set this month will bear next spring. Use an abundance of manure in preparing the ground, to insure a good crop.

## IAP ARTIST HIS OWN MODEL

Has Carved Figure of Himself in Wood Which Appears to Be Identical With Original.

One of the most marvelous workmen in the world is Hannamu Masakichi of Tokio, Japan, who has carved a figure in wood, so like himself, that when the two are placed together, side by side, it is said to be also impossible to tell which lives and which does not.

By several connoisseurs in art this wooden figure is pronounced the most perfect and human image of man ever made. Masakichi has faithfully reproduced every scar, vein and wrinkle to be seen on his own body. The figure is composed of two thousand pieces of wood, dovetailed and jointed with such wonderful skill, that no seams can be detected.

The Japanese artist posed between two mirrors while modeling this figure, and for some time after its completion, he posed frequently beside it, to the confusion of spectators, who were often entirely at a loss as to which was the artist. The figure stands with a little mask in one hand, and an instrument for carving in the other; the lifelike eyes are apparently gazing at the mask, and the face wears a look of intense absorption.

## TO EXPLORE A NEW REGION

Henry G. Bryant Will Visit Part of Labrador Never Penetrated by White Men.

Henry G. Bryant, president of the Philadelphia Geographical society, has left on an expedition for the exploration and mapping of the St. Augustine river, entering the Gulf of St. Lawrence at St. Augustine, Labrador, and traversing a country never yet penetrated by white men.

Mr. Bryant intends to make a thorough reconnaissance of the river and its adjacent country on either side, from its mouth to its source, crossing the divide of high land and descending a tributary of the Grand river and thence to Hamilton inlet and the Hudson Bay stations on its shore, a task which is likely to occupy the greater part of the summer.

Russell W. Porter of Greenland, Alaskan and Franz Joseph Land experiences, accompanies Mr. Bryant as topographer, and two Newfoundland boatmen and two Indian packers make up the party, which is fully provided with supplies and equipment. Mr. Bryant is familiar with Labrador work, having attained the Grand Falls of the Hamilton river many years ago, he being the first white man to measure and photograph this great cataract.

### "HOLY RUSSIA" A MISNOMER

Nation's Treatment of the Jews Declared to Be a Blot on Modern Civilization.

A new book by Lucien Wolf explains the precise status of the Russian Jew. The abomination of desolation that it portrays need not be enlarged upon here, but there is one point that may be quoted as an illustration of the whole stinking mass. Only one class of Jew is allowed full liberty of motion. Prostitutes may live where they please, and a certificate of prostitution is a passport everywhere. Jewesses, anxious to attend the universities, have been known to apply to the police for these certificates and they have then been prosecuted for their failure to pursue the indicated trade. Either they must be prostitutes or they must return to the pale. It seems strange that a divine power that was comparatively so stringent in the days of Sodom and Gomorrah should now be so complacent in the case of Holy Russia.—San Francisco Argonaut.

### INTERVIEWING AN ACTRESS.

The beautiful actress was taking her morning lounge. The maid entered and approached the presence.

"Muss Footlites."

"What is it, Lucile?"

"A reporter wants to know if it is true that you are engaged to the duke of Centerfield?"

"Tell him I don't know the duke, and give him a photo of myself in street costume. State that I have never met the duke, and give him a photo of myself on horseback. State also that I wouldn't marry the duke if I did know him, and give the reporter a photo of myself holding Fido. And this above all, Lucile."

"Yes, Miss."

"Tell him I am wedded to my art."

### ADVERTISES BY HIS FOOTPRINTS.

Advertisement by footprints is the latest device of the Paris boulevard publicity inventor.

The operator, who prints advertisements as he walks, wears shoes with immense soles of india rubber, which leave impressions of his announcements on the pavements. The "pads" are "reinked" by means of water, contained in a reservoir on the man's back, which flows to his feet through little pipes concealed beneath his clothes.

### THE BATTLE.

"At last we have gotten rid of that party boss!" said the patriotic citizen.

"Yes," replied Senator Sorghum "But you'll have to keep your eyes open just the same. You don't usually get rid of one boss until another boss comes along who is big enough to put him out of business."

### FATHERLY ADVICE.

"A man can't be great unless he is full of egotism," said the young man.

"So I have often heard, but don't let that theory cause you to become convinced that you can become great without doing a lot of hard work."

## One of the Number of Metcalfe's Exclusives

This is a cut of Metcalfe's new Prosperity Shaper, which is going such a long way in decreasing the irritation of men folks' necks and temples by letting all fold collars be so ironed that the slides well in collar, and collars are given nice, smooth, oval edge. It is utterly impossible for a collar to crack or break in our laundering process. Our shirt department is one which we feel proud of; not only is work done right, but the shirts are cut in Sanitary Covers. Our Dry Cleaning department is in the hands of skilled workmen.

We have flowers for all occasions. Remember that if you buy or contract for \$10 worth of coupon books, and take one during August and another when the Avalon is finished, the profits from the business, and more, go into the Avalon, a place of pleasure for Hopkinsville and surrounding country people.
